

I'm not robot!

The Microsoft GIF Animator is another great software for the nineties, this small and useful tool allows you to make GIF files from frames (images), easily. GIF Animator just adds the images to the frames work, set the options, width, height, repeat, zoom the loop and much more, then save the results to a GIF animation file. GIF Animator Example 1 GIF Animator Example 2 GIF Animator Example 3 Here's what Wikipedia says about this software: Microsoft GIF Animator is a historical computer software program for Microsoft Windows to create simple animated GIF files based on the GIF89a file format. It was freely downloadable from the Microsoft Download Center but is now only available through MSDN and on third party download sites. It was also bundled with Microsoft Image Composer and Microsoft FrontPage. This software was an add-on of the Microsoft Image Composer which is not available anymore. if you still need it you can download it from here. It was freely downloadable from the Microsoft Download Center but is now only available through MSDN and on third party download sites. It was also bundled with Microsoft Image Composer and Microsoft FrontPage. Animations can be looped, spun, and faded in and out; users can set the size and transparency of images. Automatic and custom palette creation are supported. See also External links How to use Microsoft GIF Animator Free Download of Microsoft GIF Animator Softonic reviewThe MS Gif Animator is great because it makes the creation of GIFs a very easy process. You place your video into the tool and it turns it into a GIF for you. The tool is very easy to install because it works as a stand-alone application.Change And Edit Your GIF AnimationThe MS Gif Animator doesn't have a sophisticated GUI. It is a simply-built interface that has had very little aesthetic tinkering which is bad on a visual level but it does help to keep the application small and basic. Enter your video and it turns your video into frames that make up the GIF. The GIF maker doesn't process the GIFs very quickly but in terms of usability it requires less input from yourself. It may not produce GIFs quickly but you do not need to spend hours tinkering with the tool before you start processing. In other words even if the processing and rendering is slow you will still be finished more quickly than usual because the pre-production the tinkering the editing and the file inputting time is so short.Conclusion - Great For Quickly Making GIFSThe MS Gif Animator is brilliant for people that are popular on Google+ because you may add GIFs to your Google+ profile that automatically play and loop. The output files may be adjusted to suit your needs and you can also edit the way the GIF works via the tool.Now in SpanishChangesAuthor's reviewAre you looking for animated files in GIF format, for your web page or any other use, without ever finding the one that meets exactly what you need?Here is the solution. It's a very simple tool, as much in design as in usability, with which you will be able to create your own animated GIF in the blink of an eye.It doesn't even need any installation. All you need is to execute it, select the images you want to include in your GIF animation, modify the parameters that you want from the configuration, and all set!No installation processIt makes creating GIFs less complicated than other GIF toolsManipulating the GIF output is self-explanatory on the GUIYou have to do most of the video manipulation before putting it into the toolThe interface needs updating to make it more streamlinelt takes longer to process than one may expect of a modern program
